## 4098 Gooseneck Microphone

- Outstanding audio quality
- Highly directional giving very isolated sound
- High rejection of radio frequency interference
- Available in two colours

The 4098 Gooseneck Microphone provides a highly-directional sound, perfect for noisier environments, in a sleek design with a minimal footprint suitable for any home or office setting. The 4098 is available in a variety of lengths and in Black or White with a matching base. Paired with either a simple XLR connector or the MMA-A Digital Interface, the 4098 Gooseneck Microphone provides a versatile, unobtrusive solution to improve the way you communicate with your audience.

### How to use the 4098 Gooseneck Microphone at home:

#### I have an Audio Interface

Simply use a DAD6001-BC Microdot-to-XLR adaptor to connect the microphone to your usual input.

#### I do not have an Audio Interface

Connect the headset to Channel 1 and the MMA-A to your computer with no drivers needed.
